It's Time to Think about Sustainable Sourcing

BASF introduces the first RSPO-certified lipid-based excipients for the pharmaceutical industry

A key renewable raw material for numerous pharmaceutical excipients is palm kernel oil (PKO) and its respective derivatives. The ubiquitous use of these materials across industry has contributed significantly to deforestation, loss of biodiversity and climate change. As a result, there is widespread concern about these challenges among retailers, NGOs, investors and consumers. Take advantage of BASF lipid-based products certified by the Roundtable on Sustainable Palm Oil (RSPO) and align your company and products with the strong sustainability values evolving in the marketplace.

Join BASF in committing to sustainable sourcing for lipid-based pharmaceutical excipients

- ✓ Contribute significantly to your own sustainable sourcing efforts
- ✓ Same high-quality, compendial lipid-based products with no physical or chemical changes
