

Omega-3 – Combining Purity with a Good Peace of Mind

Sustainability needs

Increase resources efficiency and reduce waste

Minimize emission into the environment and biodiversity impact

Ensure employee and patient health, safety and wellbeing

Access and affordability of medicine

Ensure cost efficiency and long-term business success

More sustainable Omega-3 products

Sustainability contribution

Sourced from healthy stocks

Based on sardines and anchovies mainly sourced in Peru

High concentration, highly efficient

Less material needed to gain effect

High purity standards

Exceeding quality and regulatory standards for food/pharmaceuticals

Less costs per serving

Highly concentrated products means higher value creation
