

Functional Solutions for Autoimmune & Autoinflammatory Pharmaceuticals

BASF

We create chemistry

Autoimmune and autoinflammatory arthritis is estimated to affect over 300 million people worldwide.¹ For many, inflammation-driven arthritis will mean years of treatments and follow-up appointments, at a tremendous physical, emotional, and financial toll. At BASF Pharma Solutions, we provide ingredients to enable quality treatments and care. We believe in inspiring medicines for better lives because good health is essential for a life of prosperity, growth, and fulfillment.

Building a sustainable future together

BASF creates chemistry for a sustainable future by offering intelligent solutions to the pharmaceutical industry. Our high-quality, industry-leading products enable you to formulate pharmaceuticals that achieve desirable target parameters.

Use BASF's vast portfolio of functional excipients to resolve oral, topical, and parenteral autoimmune and autoinflammatory formulation challenges.

Our commitment to you

We know that innovation, speed-to-market, and cost-effectiveness are essential to pharmaceutical companies. Committed to delivering on all three accounts, we use our expertise across the entire pharmaceutical value chain to drive the development and launch of various dosage forms.

Join us to inspire medicines for better lives.
